

# EMI Monitor

### Specification:

Model : CT-5189

Name : Electromagnetic Interference Monitor (EMI Monitor)

In put : ~240V , 50/60Hz , single phase use only

CAUTION : To reduce risk of fire or electric shock, use indoors only.

### Description:

Testing your home's AC outlet sockets for measure of EMI

- A LCD digital EMI Monitor(model CT-5189) is used to test the EMI levels in the home
- Simply plug the LCD digital EMI Monitor into each AC wall outlets to get the EMI reading

(Note: if the LCD Digital EMI test meter measure a "1" reading to the left side of the LCD panel, this indicates that the measurement exceeds the maximum for the LCD Digital EMI test meter)

### User instructions:

Readings	Conditions	Our Recommendations
<12 (Under 1 mG)	Excellent	Perfect living condition, Congrats!
13 - 100 (Under 2.5 mG)	Acceptable	Livable but monitor regularly suggested.
> 100 (Over 2.5 mG)	Not Good	Use of EMI Filter strongly recommended.

### Common electrical appliances with high EMI are

- Baby Monitor
- Burglar Alarm
- Clock Radio
- Cordless Phone
- CRT TV
- Dimmer Switch

- Fluorescent Lamp
- Hairdryer
- Microwave Oven
- Vacuum Cleaner.....etc

Test Report No.Z08J0175485 OF 602 EMS of MII.

The unnatural energy fields, especially those produced by alternating currents operating at 50/60 cycles per second, based on scientific research, suspected of causing:

- Sleep disorders
- Memory loss
- Chronic pain
- Headaches
- Muscle and joint pain
- Dizziness and nausea
- Leg and foot pain
- Muscle weakness and fatigue
- Fibromyalgia
- Ringing and other sounds in the ear
- Chronic fatigue syndrome
- Skin rashes and irritability
- Flu-like symptoms and other respiratory problems

### EMI has been scientifically linked to:

- Leukemia
- Multiple sclerosis
- Depression and anxiety
- Cancer
- Hypertension
- Diabetes
- Alzheimer disease
- Miscarriages
- Thyroid problems
- Asthma
- Blood and brain barrier
